

Pokémon Card NFT

Project

NFT Finance

History

- It is a financial product with strong credibility and a long history
- Trading card game launched in 1996
- Ideal as an investment product
- Due to the scarcity of cards and the appearance of popular characters
- Demand and supply are constantly increasing
- Pikachu illustration version
- The most expensive Pokémon card is 700 million yen
- to the winner of a card illustration contest in 1998.
- limited edition distributed to the winners of a card illustration contest in 1998.

A piece that fetched
700 million.

Update

- Enthusiasm as usual.
- New cards are always sold out and drawn by lottery
- So popular that major conventions are held every year in countries around the world
- In Yokohama in 2023
- Over 1,000 participants from more than 50 countries
- Cards are no longer just a stand-alone item, but have become as valuable an asset as art.

4521329322940

横浜の街に“大量発生”
ポケモン世界大会が開幕

Pokémon Card Challenges

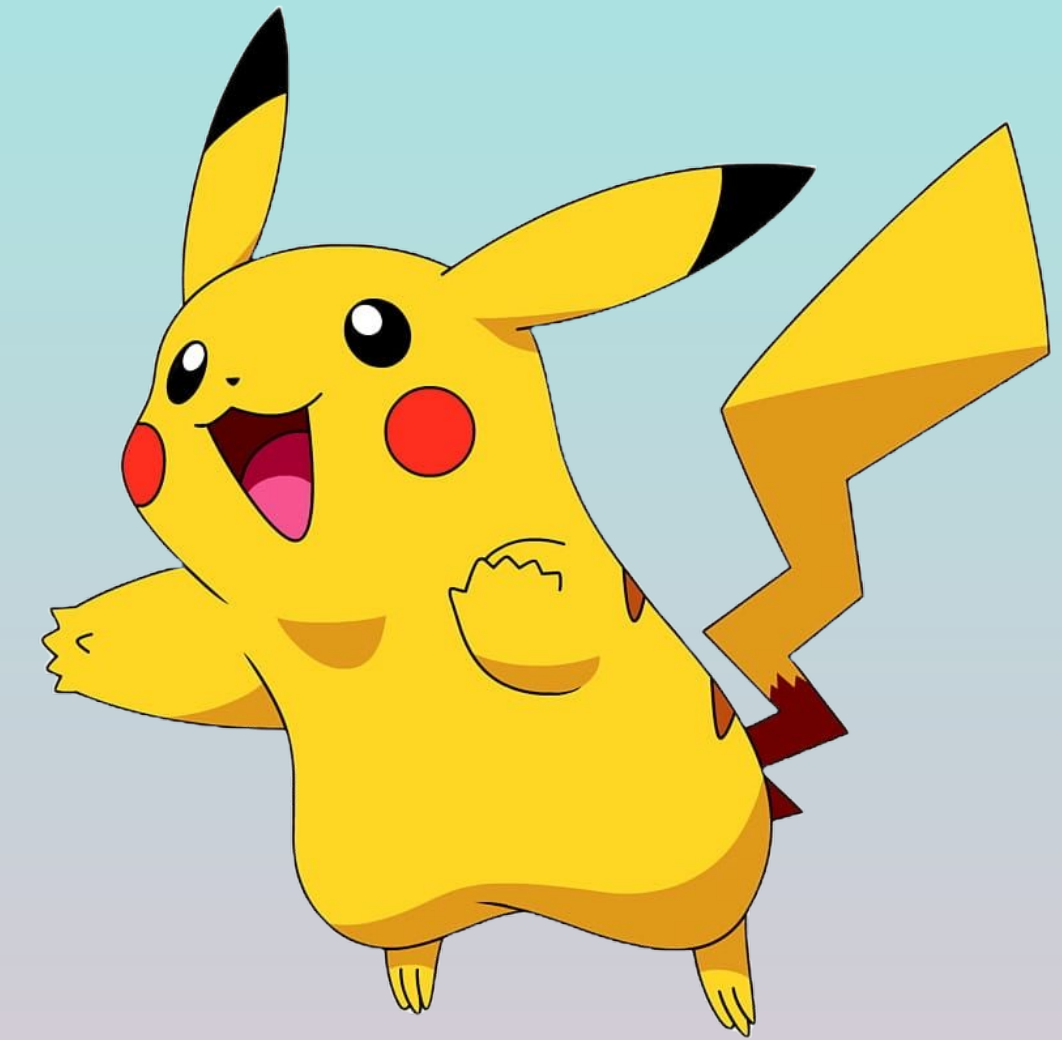

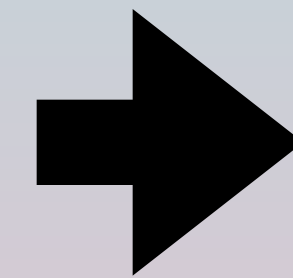

- The Problem of Fakes
- Currently, fakes are being sold from China on Mercari and other sites.
- Liquidity problem
- Cards need to be bought through card stores, so they are not always up-to-date and difficult to reflect in real time
- Sellers and buyers are not always matched
- No gameplay
- Currently, there is nothing interesting about just holding cards, so it lacks interest as an investment.

Benefits of NFT and DEXing Pokémon Cards

- The Problem of Fakes
- Fakes cannot be created by making NFTs
- Liquidity problem
- No approval required, so real-time worldwide liquidity is ensured
- Lack of gameplay
- Development of online playable mechanisms such as Oripa and competition

NFT Finance

Three advantages of NF investment

1. Realization of 40% annual interest rate by NFT staking
2. →An operational ratio that can be realized because of the DEX's absence of centralization
3. Expected to increase the price of physical cards
4. →Expectation that it is also a promising destination for asset flight
5. The physical card can be obtained by releasing the staking.
6. →Less loss of principal, and you can always get the cash
- 7.
